A. V. Brodine - Chinook, Alta.

FIRST OF BRITISH FARM LABORERS

The first of the British farm laborers arrived in Chinook on March 31st, when the local Field Supervisor, D. E. Holloway, of the Land Settlement Board, met Sydney Elston, who was placed with N. E. Taggart, of Lanfine, and Frank Elston, who was placed with J. R. Anderson of Excel. These men receive six weeks' training from the British Ministry of Labor Training School in England for placement as farm laborers by the Land Settlement Board. They are trained by Canadian Instructors with Canadian equipment, and only those considered adaptable to conditions in Canada are passed by the Instructors, thus farmers applying for such help are assured of getting suitable and dependable help.

There are more of these laborers ready for placement and farmers can secure such help and all information by applying to Mr. Holloway. These men do not leave for Canada until all arrangements for their placement have been made.

Women's Institute Concert and Dance

Don't fail to attend the event of the season—the Women's Institute concert and dance, Friday, April 12th. A full evening's entertainment. See the ladies in their two act play, "A Fit for every circumstance," also the kiddies in their folk dances. Bring along a "candy-hungry" feeling. Mrs. Deman and Mrs. Hurley will cater to your wants along these lines.

Remember the date.
And don't come late.
Admission: Adults 50c, children 25c.
Lunch 25c. Dance 50c.
Concert commences 8.15 sharp.

PRAIRIE FIRE SOUTH OF TOWN

A bad prairie fire was started on the farm owned by Richard Thompson, last week. It seems that Mr. Thompson was burning a straw stack when the fire caught in the grass and it being so dry the fire got great headway and ran to the distance of seven miles frontage. Mr. Cyril Britton's granary took fire and burned to the ground, the granary contained about 20 bushels of wheat. Mr. Kenneth Britton, who is at present in England, lost his barn by the fire and also his pasture except 40 acres.

MARRIED AT CALGARY

Mr. Elvin Robertson and Miss R. Broston, eldest daughter of Mr. M. Broston were married at Calgary last week. Both the bride and groom are well known in Chinook district and are highly respected. The Advance joins their many friends in wishing them a very happy married life.

market at the present moment." "A few weeks ago the Argentine was putting ten and one-half million bushels of wheat out per week." "The market is over crowded." "Wheat is being forced out for sale without proper provision for its purchase." "The Argentine is a striking example of disorderly marketing."

Another high-light touched by McIvor during the day was to the effect that the policy of the sales agency of the wheat pools is not to ship out grain to the ocean unless it has been sold. Occasionally, through the Pacific route, shipments are made prior to a sale having been arranged, but because of the length of time for a shipment through this route (seven weeks) that method is not as dangerous as it is when shipping through the Atlantic route. Mr. McIvor said it was "dangerous" to ship before sale is arranged, as the shipper is often placed in the position of having to sell at the buyers' price, no exercise of control over the price by the shipper being possible.

CARD OF THANKS

H. D. Connor wishes to thank the people of Chinook for their kindness and sympathy in his recent bereavement.

ALLIS-CHALMERS TRACTOR SCHOOL

A tractor school and field demonstration of the Allis-Chalmers 20-35 will be held at Cereal on Friday, April 5th.

LADIES' CARD CLUB

The Card Club met at the home of Mrs. L. S. Dawson on Tuesday evening, the prize-winner being Mrs. J. S. Smith. The prize was a lovely bon-bon dish. The Club will meet at the home of Mrs. Massey next week.

CANADIAN WHEAT VS. WHEAT OF OTHER COUNTRIES

WINNIPEG, March 22.—Canada's wheat is selling today at a higher parity over any other country in the world that is has ever been sold.

This was the information given today to the royal grain inquiry commission by George H. McIvor, general sales manager of the Canadian Wheat pool, during the course of his evidence on a variety of subjects with which the selling agency of the Pools is concerned.

Mr. McIvor also stated that yesterday Rosale, the highest type of Argentine wheat was selling on the fair average quality basis, 64 1-2 lbs., at \$4.61 per 100 lbs., while Canadian No 5 was

offered for sale by the pool at \$4.79. In other words, it was pointed out, the Canadian Pool was asking for No 5 Canadian wheat 18 cents more than that of the highest quality of Argentine wheat. Ordinary Rosale sells on a parity with Canadian No. 3 wheat. Latest advices to the pool on the Australian prices shows that the best Australian wheat is selling at a slight premium over Canadian No 4.

Some interesting observations were made during the day by Mr. McIvor, he being the only witness giving evidence to the commission at the two sessions yesterday. Here are some of them: "I do not think the world can comfortably consume wheat at the rate at which it is being put on the

Canada's Future

In a very fine address by Mr. Graham Spry, secretary of the Association of Canadian Clubs, and printed in "The Canadian Nation," the subject of Canadian unity is dealt with under the title "One Nation, Two Cultures," which was likewise the heading over the article appearing in this column last week. In fact, last week's article was inspired by Mr. Spry's address.

In his speech, Mr. Spry urged that, above all, the two Canadian races should be frank with each other, speak out their feelings freely and courteously, and attack that underlying menace, the fear, the suspicion which ignorance breeds; and "working for common national ends, working the same national institutions, and developing the same national estate, they will learn to know each other, to recognize each as a Canadian, to feel a sense, not of fear, but of partnership." Then he said:

"One nation, two cultures; one nationality, two races; one loyalty, two tongues, on this the Dominion of Canada is founded, on this the partnership rests by solemn contract, by mutual trust. And thus it must abide or perish. Let it abide, and the nation will grow greater, and the world richer that two races, full of spirit, rich in the heritage that time endows, a tongue, a culture, each their own and shared at times in common, may live in unity as one, secure, serene, partners in the development of the noble estate to which we are fortunate successors. Let it fail, let race seek to dominate race, let prejudice take its reign and ride rough shod through the fine bonds that unite us and Confederation shall perish, and the peoples of Canada be thrust towards a future, dark and impenetrable."

Looking back over the sixty-odd years of Confederation, can any one imagine what the position of the present Dominion of Canada would be had the Canadian people of both races in 1867 not agreed to sink their differences and agree upon compromise policies and enter into a solemn compact with each other, both for the present and the future. Had such agreement not been reached there would have been no Confederation. Had there been no Confederation what would in all likelihood be the position and status of British North America today?

Would it be British? It is extremely doubtful. Long ere this it is highly probable that large sections of what is now Canada would have become merged in the United States. Certain it is that failing Confederation, the isolated Crown colonies would have remained weak, undeveloped. Instead, we have a great and prosperous Dominion, rapidly forging to the front as one of the great nations of the world, a tower of strength to the Empire, and already exerting no mean influence in the councils of the nations. The union effected by the solemn guarantees of the act of Confederation was not alone the creation of the Dominion; it was the salvation of the country at large.

Not only must the letter of that contract be lived up to, but the spirit must be observed. Failure on the part of the Canadian people, whether of British or French extraction, to recognize both the letter and the spirit of the union effected by Confederation will be fatal to its existence. And if Confederation fails, what are we to put in its place? Confederation is weakened by sniping tactics on the part of one race against the other, and if Confederation is weakened it may perish. On the other hand, cordial acceptance of the spirit of the Confederation pact, which we all read annually on Dominion Day, will add strength to the structure, and enable a united Canadian people to resist all attacks upon their sovereignty and develop in peace their great heritage.

As Mr. Graham Spry truly states, any other future for Canada but that bound up in full acceptance of terms and spirit of the Confederation pact is indeed dark and impenetrable.

Utilizing Waste Product

Hot Water From Pueblo Factories Cleans Ice From Streets

Hot water as a waste product from ice plants and other factories of Pueblo, is being used by the city highway department to remove snow and ice from the highways. Street sprinklers and flushers are filled with the hot water and driven to the downtown streets. With one splash, following another, both directing streams of hot water onto the pavement, snow and ice melt immediately and are drained away. The hot water, obtained free, saves the city large amounts usually spent shoveling and hauling snow off the streets.

The trouble about mild weather which saves fuel bills lies in the fact that too often the saving has to be paid to the doctor.

Up to well into 19th century, in England, forgery was punishable with death.

Prisoner For Eight Years

Russian Boy Punished By Father For Joining Red Army

A story of an eight-year imprisonment of a boy by his father in a pit near their hut in the village of Savchukovo, Kursk province, has been brought to Moscow. In 1918 young Tarasoff joined the Red Army and three years later returned to his native village filled with enthusiasm for the new order. His reactionary father told him "the red army marches against the Cezars and you must not serve its ranks."

According to the report, that night old Tarasoff dug a deep cave in his garden and binding his son hand and foot threw him into the pit apparently to keep him there until the return of the old order. Recently the father died and the villagers, chancing upon the living grave, extricated the worn and wrinkled man who although only 29 years of age had snow white hair. He was said to have been placed in a hospital.

PAINS IN THE BACK

These Are Usually Due To a Weakened Condition Of The Blood

The muscles of the back are constantly under heavy strain, and have but little rest throughout the day. They are therefore in need of all the nourishment and strength that plenty of pure red blood can give them. Unless they have this help, you will have backache and continue to have it.

Backache seldom or never means kidney trouble. It is nothing more than the tired, worn-out muscles of the back showing their exhaustion because of the lack of good, pure blood. The one generally recognized efficient blood builder is Dr. Williams' Pink Pills. When the blood has been improved through the use of this medicine backache disappears.

Mrs. F. Fairbairn, Essex, Ont., tells what Dr. Williams' Pink Pills did for her in a case of this kind. She says: "I suffered for many years with a weak back. At times the pains were so bad that I had to walk half-dressed over. I had tried several doctors with very little benefit. A friend urged me to try Dr. Williams' Pink Pills. I did so, and oh, the joy of once more being able to stand up straight without suffering intense pain. After using two boxes there was no doubt the pills were helping me. I used eight boxes in all and have not since had a sign of the trouble. I can do all my household and not feel worn out as formerly. For all this I thank Dr. Williams' Pink Pills."

If of your decision does not keep these pills you can get them by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

So Sympathetic

Mrs. Morningglow—Where is your magnificent big dog? You don't mean to tell me you've sold him.

Mrs. Nickelplum—Yes, we sold him. It seemed a shame for a dog to occupy that commodious doghouse this winter when so many people are homeless and we disposed of him and rented his home to an artist.

The worms that infest children from their birth are of two kinds, those that find lodgment in the stomach and those that are found in the intestines. The latter are the most destructive, as they cling to the walls of the intestines and interfere with work have there. Miller's Worm Powders dislodge both kinds and while expelling them from the system serve to repair the damage they have caused.

Speeded Up Paint Job

Mike was engaged to do a job for Mr. Smith. After a while he came in saying the job was completed and asked for his money.

"But, Mike, I wanted two coats of paint on that building," said Mr. Smith.

"Begorra, you've got it," said Mike. "I mixed the first coat with the paint for the second and put both coats on at the same time. Speed is my motto."

Short of Breath

Smothering Feelings Choking Sensation

Mrs. H. Day, Dartmouth, N.S., writes:—"For over a year I was troubled with smothering spells and shortness of breath, and it was impossible for me to walk, even a short distance, because of the choking sensation which followed."

After trying many treatments, in vain, I at last decided to try

MILBURN'S HEART AND NERVE PILLS

and in a surprisingly short time they did me much good.

Price 50c per box at all druggists or dealer, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

I've forgotten I ever had any nerves

Your doctor will tell you how the act of chewing relaxes and soothes strained nerves, and how the healthful cleansing action of Wrigley's refreshes and tones you up all round. Aids digestion.

Opportunity For Canadians

Several Positions Are Open On Staff Of League Of Nations At Geneva

Opportunity for young Canadians who wish to live in the beautiful city of Geneva, and to become associated with the work of the League of Nations, is offered by a notice from the Civil Service Commission of Canada, circulated for the authorities of the League, which invites applications for one important and two lesser positions. Competitions are open to men and women.

The chief position advertised is that of secretary of the narcotic division of the permanent central board of the League. Applicants must speak both French and English, be under forty-five years of age, have had knowledge and experience of administrative and secretarial work, and be trained statisticians. Preference will be given to those having experience or knowledge of the narcotic problem, and any familiarity with the languages of Eastern and far Eastern countries. The salary attached to this post is about \$4,500 per annum.

A statistician at a salary of approximately \$1,700 a year is also required for the same division who must be bi-lingual and well qualified in commercial statistics. A secretary shorthand and typist is the third job, which calls for an experienced stenographer with some knowledge of drafting, filing and translation. This post carries the salary of \$1,700 per annum. Annual increases of \$50, are granted for the two last jobs up to a maximum of \$2500 a year.

Those interested are requested to send their applications not later than April 1st, to the Secretary of the Appointments Committee of the League of Nations at Geneva.

It is pointed out by those in charge of the central headquarters of the League of Nations Society in Canada, that quite a number of Canadians have made outstanding reputations in the work of the League, at Geneva, and that positions of those kind offer a splendid opportunity to ambitious people from the Dominion as promotion or transfer to more important work, is practically certain, if those getting the appointments show special aptitude in the League's activities.

Cold Killed B.C. Beaver

Many Imprisoned In Lakes Which Were Frozen To Bottom

"Thousands of beaver are believed to have perished in their homes in the lakes and streams of interior British Columbia as a result of the recent protracted cold spell."

Harry Smith, who has trap-lines in the Aberdeen Lake and Grizzly Swamp country, reports that many of the little animals are dead in the higher altitudes and he bases his belief on the observations of a woodsman of many years experience. When all is well in the beaver huts said Smith, snow soon melts on the tops. Now there are heavy blankets of snow on all the houses along the traplines.

Smith believes that as the water was low in the lakes the entrance to the beaver huts was in shallow water. Heavy frosts came before the snow. The result is that many lakes are frozen to the bottom and the beaver imprisoned therein.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

The huge fog born of a first-class lighthouse requires an engine of seventy-two horse-power to work in. It can be heard at a distance of twenty miles.

Minard's Liniment For Coughs and Colds.

Monarchy Divides Germany

Many Incidents Show How the People Are Constantly Happening In Germany To Show That the People Are Still Sharply and Incurably Divided over the Question of the Monarchy.

At Breslau a motion picture of the city council to remove the statues of three former emperors, including the ex-kaiser, and to rename streets in honor of revolutionary heroes occasioned a bitter fight but was passed by a vote of 40 to 38. At Nimsch, Silesia, when guests entered a hall on the occasion of a state dinner the portraits on the walls of three former kaisers were seen to be covered. This precipitated a sharp quarrel and conflict which broke up the party.

Shipping Is Handicapped

On account of an outer and inner bar crossing the channel connecting Lake Maracabou with the Gulf of Venezuela, only vessels drawing less than 12 feet of water can enter the port, with the result that but two shipping companies, one American and one Dutch, maintain a weekly passenger and freight service between New York and Maracabou.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine, and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Competes With Canada

Forty or fifty years ago, Denmark was a grain producing country. Then the Western Canadian prairies began to export grain cheaper than Denmark could grow it, and so she turned to dairy farming and its natural complement hog raising. Now she competes with Western Canada in selling bacon to England.

You Can't Dye a Dress with Promises!

You can't dye a dress—no matter how careful you may be—without real color. That's the idea behind Diamond Dyes. They are made to give you real service. They contain from three to five times more aniline than other dyes on the market.

Next time you want to dye, try Diamond Dyes. See how easy it is to use them. Then compare results. Note the absence of that re-dyed look; of streaking, or spotting. See how soft, bright, new looking the colors are. Then observe how they keep their brilliance through wear and washing. If you don't agree, try Diamond Dyes are better dyes, your dealer will refund your money.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool.

Your dealer has both packages.

Minard's Liniment prevents Flu.

SAYS WORLD IS APPROACHING A FINANCIAL CRISIS

London, Eng.—Sir George Paish, British financier and economist, who recently predicted the world was approaching a financial crisis, considers the 20 per cent. call money rate reached on the New York Stock Exchange a possible forerunner of the crisis, he told the United Press.

The white-haired authority on world economic conditions pointed to recent bank rates in various countries as indications that the world was suffering from what he termed "financial sickness."

"I am no prophet, however," he said. "I am simply an interested observer attempting to diagnose the world's financial troubles. In my recent speech at Manchester, I simply called attention to a situation which I have been watching develop for some time past."

The world in general was over-borrowing, with the possible exception of South America, Sir George said. He emphasized "the utter folly" of various nations erecting tariff barriers which would prevent reimbursement of their mutual debts.

"It is of very great moment," he said, "that the situation should be surveyed not only by bankers and business men but by statesmen as well, in order that a collection effort may be made to avert a still more dangerous situation than now exists."

"High money rates in America since the middle of last year have been a notification to the world in general that America's power to lend has become much smaller and it is obvious that still higher rates of interest now current in America and the effort of American bankers to restrict credit already granted in the states themselves, imply an almost total cessation of American credit to outside countries," Sir George said.

"Moreover, a high rate of interest cannot fail to affect American business adversely. If it is borne in mind that the great quantity of credit granted by the United States until the present time has been mainly responsible for the maintenance of world prices for commodities at the present level it is obvious that restriction of this credit must bring about a general fall of prices with consequences to producers throughout the world that cannot easily be measured."

"The situation would be exceedingly difficult if the volume of credit already granted were of normal dimensions, but, having regard to the vast amount of credit that has been granted throughout the world, it is obvious that restriction of American credit at the present time in the manner that seems probable cannot fail to cause a great world wide monetary stringency which in turn, cannot fail to have serious consequences to both credit and business."

Counsel For Alberta

Edmonton.—S. B. Woods, K.C., has been retained as counsel for the Alberta government in the British Columbia appeal of the Canada Privy Council against the grain rates decision of the railway commission. Both Alberta and Saskatchewan are supporting the coast province in this action, and Mr. Woods will represent this province when the case comes up at Ottawa. No date for the hearing has yet been announced.

Scientific Fox Breeding

Munich, Bavaria.—Breeding of silver foxes on a "high-brow" scale is being undertaken by eight university professors of Tankenstein, Bavaria. The farm which they have established with eight pairs of foxes as a nucleus will be conducted wholly on scientific principles. Eventually the learned men hope also to breed other fur bearing animals.

Receives Life Sentence

Port Huron, Mich.—Sylvester Brown, reputed rum runner, was sentenced to life imprisonment in solitary confinement after pleading guilty in circuit court to first degree murder for the slaying of Earl A. Roberts United States immigration officer on the border. Roberts was shot and fatally wounded at Algonac, south of here.

Long Flight Ended

Rio De Janeiro.—The Spanish aviators, Jimenez and Iglesias, handed their plane the Jesus del Gran Poder, at Bahia after completing a flight across the South Atlantic.

Radio Commission

Making Western Trip

Will Investigate Domestic Conditions In the Broadcasting Field
Ottawa.—The royal commission on radio broadcasting headed by Sir John Aird of Toronto, will leave for Western Canada on April 5, to inaugurate its program of hearings into domestic conditions in the radio broadcasting field.

The commission will proceed direct to Vancouver, where the members will attend some of the sessions of the National Council of Education, which has placed on the convention agenda several papers relating to the radio question. A debate will also be held on the subject: "A national policy or exploitation of the radio." Hearings will be held in Vancouver and Victoria.

Public sittings will be held later in Edmonton, Calgary, Saskatoon, Regina, Moose Jaw, Brandon, Winnipeg, Port Arthur and Fort William, followed by a tour of Ontario, Quebec Maritime provinces and a visit to a number of centres in the United States.

The final report of the commission is expected to be submitted to the government before Parliament progresses.

Disastrous Prairie Fire

Large Strip Of Country Swept Bare By Flames

Regina.—A prairie fire started northwest of Nedeauville, Sask., destroyed thousands of acres of pasture, the buildings on three farms, and was responsible for a man being sent to the hospital at Medicine Hat, where his wounds, though serious, are not thought to be fatal.

A strip of country about ten miles wide and twenty-five miles long was swept bare. At its closest to the main line of the C.P.R., it was ten miles away, north of Tompkins.

George Campbell lost his barn and outbuildings but managed to save his stock, some of this being salvaged when running through the fire. His loss is estimated at \$1,000.

John Fisher and family were driven from their home, which was destroyed by the flames, and are staying with neighbors. Mr. Fisher also lost all his buildings and feed for stock work on the farm. His loss is placed at \$1,500.

Fred Robinson, by plowing a fire-guard around his buildings saved these, but lost all his feed, valued at \$300.

Advertise Zeppelin Cruise

Plan Trip From Germany To America In May

Frankfort-On-the-Main, Germany.—For what is believed to be the first time in history, the advertising columns in a daily newspaper were invoked to secure passengers on a long airship pleasure cruise.

The Frankfurter Zeitung carried the following advertisement, inserted by the Hamburg-American Line Berlin Travel Bureau:

"The second Zeppelin cruise, to the Mediterranean and the Orient, will start about April 15 from Friedrichshafen. Passage per person 3,000 marks (about \$750)."

"Zeppelin cruise to America about May 10. Passage from Friedrichshafen per person, \$2,000.

Wants Records Corrected

American Soldier Reported 'Killed In Action' Asks To Be Declared Alive

Santa Rosa, Cal.—Thomas R. Smith, of this city, reported "killed in action" during the World War, is very much alive and has appealed to the American Legion in an effort to have himself declared so.

For 10 years the government has been insisting that Smith's sister, Mrs. Nellie Johnson of this city, accept \$10,000 in war risk insurance for her brother's "death."

Mrs. Johnson and her brother both steadfastly refuse to admit he is "dead," and now Smith has asked the American Legion to aid in straightening out the records at Washington.

Many Families For West

Saskatoon.—Agents of the Canada Colonization Association recently announced they would bring 600 families to Canada by the end of August. Between 250 and 300 of these families will be settled in Saskatchewan.

Re-Elected Governor

London, England.—The Right Hon. Montague Norman has been re-elected governor of the Bank of England. Sir Ernest Harvey was named deputy governor.

Train Crew Arrested

Responsible For Wreck At Droccourt According To Coroner's Finding

Perry Sound, Ont.—Responsibility for the wreck of two Canadian National trains at Droccourt, with a death toll of at least fourteen was placed on the crew of the northbound train No. 3 in the written verdict of Special Coroner J. B. Broughton.

Criminal proceedings were at once instituted against the three surviving members of the crew and charges of manslaughter were laid against Engineer J. V. Alexander, Fireman E. Riley and Rear End Brakeman Charles Gorrie.

The arrest of the three trainmen followed the verdict of the coroner's inquest on the death of Horace Smith, one of the victims of the wreck. According to the verdict the collision of the two fast trains was "due to the neglect of the crew of Train No. 3 in running past the meeting place at which they had orders to stop."

It is expected the three accused trainmen will appear for trial at the spring assizes, which open here May 14.

MARSHAL FOCH IS BURIED WITH IMPRESSIVE RITES

Paris.—Marshal Foch was laid to rest near the tomb of Napoleon. More than a million heads bowed as the great soldier was borne on a gun carriage from the stately gothic nave of Notre Dame Cathedral to the simple and severe chapel of the Invalides.

Church and State, separated in France for more than twenty years, united for the day to provide the devoted Christian soldier with a national funeral unparalleled in pomp and magnificence. The world has seldom seen its like before and it is not probable that such a show of solemn splendor will be repeated in this age.

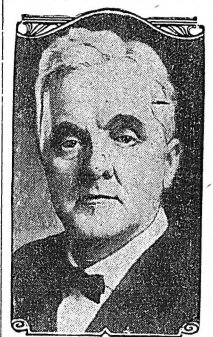

The Republic of France and the Church of Rome were joined by tenations whose armies Foch commanded in the greatest of wars in helping honors upon the bier of the modest master of ten million warriors.

Most of the civilized world was represented at the church funeral ceremony, and in the cortege that moved with military pomp and precision through the streets and squares of Paris from Notre Dame to the golden dome of the Invalides.

The great outpouring of people who watched the funeral procession provided the crowning stone of the great edifice of honor and love which a grateful nation and friendly people of other lands have steadily built to the greater glory of Foch's name since the day he was chosen from all military commanders of the Allies to lead 10,000,000 fighting men under 10 flags.

Premier Poincaré, who was president of France during the war, said in his brief funeral address that Foch had had no other ambition than to serve, and had wished no other recompense than the assurance of having accomplished his duty.

PRaises HYDRO DEVELOPMENT

Senator Norris of Nebraska, who praised Ontario Hydro development as one of the greatest in the world and the St. Lawrence development as most tremendous undertaking of this civilization. He also declared the United States high tariff policy is not wise.

Lightning Strikes

Peace Tower

Electric Storm At Ottawa Turned Day Into Night

Ottawa.—Batteries of a recent severe electric storm centred their bombardment upon Parliament Hill and lightning playing directly over the buildings, struck the Peace Tower and caused the mighty pile of granite to shudder with the shock.

Lightning conductors prevented any serious damage. Only the tower elevator was put out of order. A second blinding flash struck at the southeast corner of the centre block, just above the rooms of the press correspondent, causing some consternation. There was no damage here, however.

The storm made the day as dark as night.

To Study Tourist Traffic

New Subject Taken Up At German Academy Of Commerce

Berlin.—Scientific research of tourist traffic, including particularly a study of its causes and its social, political and economic effects, has been added to the curriculum of the Academy of Commerce of Berlin. Transportation methods, hotel management and the work of expositions and fairs will also be studied, while special courses will be arranged for directors and managers of hotels, spas, fairs and so forth. A library dealing with the subject is to be assembled by the academy.

Appointed Poultry Promoter

Regina, Sask.—Appointment of W. H. McLellan, Saskatoon, as provincial poultry promoter, effective May 1, was announced by Hon. C. M. Hamilton, minister of agriculture. Mr. Hamilton said the appointment was made on the recommendation of the Saskatchewan Poultry Breeders' Association, in recognition of the growing importance of the industry in the province.

FLYING GOLD SEEKERS

Capt Charles Sutton, chief of Canada's flying gold seekers, accompanied by Mrs. Sutton, is here seen just to taking off from the Fairchild airport, Farmingdale, L.I., for an expedition to the Canadian Northwest.

Chinese Law Courts

Busy With Divorces

Number Of Cases Greatly Increased Under Nationalist Rule

Shanghai.—Divorces have come to China to stay. With the National Government more firmly entrenched and the women of the country quickly seizing their newly found freedom, the Chinese law courts daily are handling an increasing number of divorce actions.

Last year a record was set in Shanghai courts with a total of more than 1,400 divorces, a gain of more than 800 over 1927. In 1928, before the establishment of Nationalist rule in Shanghai, divorces failed to reach the hundred mark.

Survey of the 1928 divorces based on statistics compiled by the United Press, reveals that spring and summer are the "big" seasons, with fall and winter trailing quite a distance behind.

More than 60 per cent. of 1928's divorces were filed between May 1 and September 30, the remaining 40 per cent. in the other seven months of last year. December wound up the year with 75 cases, just a little more than 5 per cent. of the year's total.

Planning Survey Of

Pacific Great Eastern

B.C. Seeking Services Of Alberta's Deputy Minister Of Railways

Victoria.—J. Callaghan, deputy minister of railways and telephones for the province of Alberta, has been in conference with Premier S. F. Tolmie and cabinet ministers in connection with the proposed survey of the Pacific Great Eastern Railway. It was learned the services of Mr. Callaghan, while the survey is being made, is sought by the government, as he was connected with the P.G.E. work when the line was first laid.

Premier Holme stated that as yet it had not been decided whether the services of Mr. Callaghan could be obtained.

Many Receive Assistance

Thousands Helped Last Year Under Empire Settlement Act

London.—Answering questions in the House of Commons Right Hon. L. C. Amery, secretary for the Dominions, stated that during 1928, 27,523 persons proceeded to British North America with financial assistance under the Empire Settlement Act. This compared with 20,619 to Australia and 2,175 to New Zealand. Information was not available regarding the number of assisted migrants who returned to the United Kingdom in the same period, he said.

GIANT GERMAN OCEAN LINER IS PREY OF FLAMES

Hamburg, Germany.—The mysterious fire which virtually destroyed the new North German Lloyd liner Europa, was expected to have an important effect on the North Atlantic traffic war.

The Europa, a 46,000-ton vessel, was being built for five-day service with the Bremen between New York and the English Channel, and was considered a challenge to the Cunard White Star and Hamburg American lines.

The ship caught fire while only a few workmen were aboard her. She was scheduled to make her maiden voyage in July and construction was nearing completion when the fire broke out suddenly.

Cause of the fire probably never will be known, it was said, since it started in four places simultaneously deep in the hold. Experts did not believe it was arson, however.

The vessel was insured for 40,000,000 marks (about \$5,500,000) but the loss was estimated at about 50,000,000 marks (about \$11,890,000). Shipyard engineers claimed later, however, that the damage was not that large.

Although the ship was not a total loss several experts said it would be useless to rebuild it. The North German Lloyd Company was expected to refuse to accept it from the builders, Blohm and Voss.

The fire was spectacular. Starting before dawn, it was not brought under control until 3 p.m. The boilers, machinery, hull and lower decks escaped the fire.

None of the few workmen aboard when the fire started were injured, but a fireman was overcome. Eight hundred men were thrown out of work by the fire.

TEST SHIPMENT OF GARNET WHEAT TO GREAT BRITAIN

Ottawa, Ont.—Between 4,000 and 5,000 bushels of Garnet wheat will be put into sacks at Fort Williams to be shipped overseas. Excellent progress has been made in preparing this shipment which is done with a great deal of care in view of the importance to the grain growers. The future of this type of wheat will largely depend upon whether this consignment meets with favor among the millers of Great Britain and Germany.

It was first planned to ship 10,000 bushels in an open car but after consideration by the Wheat Pool which is looking after the arrangements and the Dominion department of agriculture, it was decided to bag about half the amount and ship that instead. The wheat will go to London and from there be distributed to British millers and a representative miller in Germany. The department of agriculture officials expect that complete reports will be available before the 1929 crop is ripe.

It was explained at the department that all the reports so far from both Britain and the United States have been satisfactory to Garnet wheat. The Canadian millers, however, have not been so favorable to this early ripening variety with the result that it has never been graded as No. 1. In many parts of the prairies the Garnet, because of its big yield and early ripening qualities, is the favored variety, and if it can take its place alongside of Marquis No. 1 it will mean much to the producers.

The department officials are confident that the report will be favorable because Garnet is a very hard wheat and it is believed will prove just the blend the British millers require to give the "punch" to the softer grades they import from other parts of the world. The present shipment will enable a thorough test by Canada's wheat customers.

Between Canada And U.S.

Matter Of Ship Sinking Turned Over To Hon. Vincent Massey By British Envoy

Washington, D.C.—The sinking of the rum runner "Typhoon" in the Gulf of Mexico by a United States coastguard patrol has resolved itself into a question for settlement between the Canadian and United States governments.

Sir Esme Howard, the British ambassador at Washington, who had made the original enquiries at the state department, concerning the sinking of the vessel, informed the United States government that the ship was of Canadian registry and replies to his enquiries should be addressed to Hon. Vincent Massey, Canadian minister at Washington. All discussion will henceforth be conducted between the Canadian and United States governments.

For Winter Fair Building

Saskatoon, Sask.—The provincial government is prepared to contribute one-third of the cost of a \$100,000 winter fair building at the exhibition grounds here on condition that the city of Saskatoon and the federal government donate like amounts. Charles Agar, M.L.A. for Saskatoon County made this announcement recently. Mr. Agar says it is practically assured that the federal government will contribute and almost certain the city would.

Released From Custody

Toronto.—Mary De Merto, a gypsy, who was held suspected as being a woman by the same name wanted on a charge of theft at North Battleford, Sask., was released from custody, when Provincial Constable W. McRae, of Saskatchewan, failed to identify her as the wanted woman.

Size Of Chinese Armies

Peking.—There are just over 1,500,000 men in the officially recognized armies of China today, according to the official reports of the various military commanders as reported by Kuo Min, the Chinese official news agency. These do not include the numerous bandit organizations.

Regina Residents Killed

Regina, Sask.—Two well known residents of Regina, Mr. and Mrs. Armour, were instantly killed when their motor car was struck by a Los Angeles bound passing express at a level crossing on the Southern Pacific route. Both bodies were mangled in the wreckage.

Expansion Of Manufacturing In Prairie Provinces Expected To Proceed At a Rapid Rate

No sooner does an originally agricultural community tend to become stabilized and develop community centres than an effort begins to build up local industries. This tendency grows as the years pass on even without the additional impetus received when, besides a productive soil, the country is also found to contain valuable minerals. This has been the history of the Prairie provinces, especially in the post-war period, when it has been found that the rich mineral belt of Quebec and Ontario extends westward along the same parallel. Industrial action, therefore, is likely to proceed even more rapidly than heretofore, more especially should the natural resources of these provinces be restored unrestricted.

These provinces, long dependent upon external sources for manufactured products are more than ever set on achieving complete economic independence and are gradually accomplishing it. The period, indeed, is rapidly approaching when the cities of Manitoba, Saskatchewan and Alberta will pride themselves on their industrialization just as do the much older Eastern centres and conduct as ardent a propaganda for the stimulation of their local enterprises. Already in Manitoba the output of manufactured goods is approaching the value of its farm products. Last year its industries turned out goods valued at \$150,252,000.

Dominion Government statistics, indeed, indicate that farming is already in second place to industries in that Province now. Revenue from farming in Manitoba in 1927 amounted to \$115,071,000, whereas the value of manufacturing production in the Province in 1926 was \$132,715,152. Manitoba, being the largest established of the three provinces and the tendency of its industries being to move westward, the trend is much more pronounced here than in the sister provinces. According to the Manitoba Industrial Development Board, a 21 per cent. increase was recorded last year in the Province's manufacturing output, the greatest growth being in steel, iron and paper products produced. In the period some sixty-two new industries were established with several other important locations foreshadowed.

The future will see an expansion of manufacturing in the Prairie Provinces at an increasing rate in the consistent effort to reduce the volume of imported necessities. It is not, however, to be anticipated that over the territory as a whole agriculture will ever take second place to manufacturing, but that rather the two will extend along parallel lines, each providing ever larger markets for the other. Industrialization should only increase western Canadian agricultural opportunity by building up a larger domestic consuming population and increasing the need for new farmers.

To Hasten Grain Planting

Day and night grain planting may be tried in Germany to avert a possible serious shortage of bread supplies during the coming year. German agricultural leaders, faced with small crops resulting from the February cold wave, are of the opinion that 24-hour planting is the only solution to the difficulty.

Customer: "I want to buy a house."

Real Estate Agent: "Did you have anything special in mind?"

Customer: "Yes, I want one with a parking place for my car, a sparkling place for my daughter, and a parking place for my dog!"

A cubic foot of water is convertible into 1,661 cubic feet of steam.

"Well, do you want three pennyworth of meat for the cat like yesterday?"

"No thanks, uncle has gone home again." Mouskette, Chartered.

W. N. U. 1779

G. F. Goldthwaite, appointed Advertising Manager of the Canadian National Railways, to succeed the late H. R. Charlton.

Revised Rules For Hog Grading Adopted

Definite Classification Is Provided For In New Regulations

New hog grading regulations, which have been under consideration by the department of agriculture for a considerable time, have been passed by order-in-council and will become law upon official promulgation it was announced by Hon. W. R. Mather, minister of agriculture. The new regulations provide for definite classification of bacon and non-bacon hogs, involving revision of grades so that hogs heretofore will be graded as nearly as possible in accordance with their actual commercial value.

Packers have undertaken to try to maintain the spread of 50 cents per 100 pounds between "selects" and "bacons" and all other grades have been left to find their own market level in accordance with the principle agreed to at the 1929 swine conference in 1927.

The new regulations also provide for the compulsory grading of all hogs at local shipping points in accordance with the official grades. "During the past year the federal department has had an opportunity to test out the practicability of country grading and are satisfied that it is feasible. Under this new regulation it will now be possible to get the information regarding the grade back to the farmer, as was requested by the producers' representatives at the 1927 swine conference held in Ottawa," Mr. Mather's statement says.

Other changes involve strengthening of the wording of the regulations from a legal standpoint, with a view to eliminating as far as possible the need for litigation in their enforcement.

Expansion Of Motor Traffic In Britain

Ownership Of Cars Is Growing By About 100,000 Annually

The notion that the United States has a monopoly on motor traffic expansion is disproved by a report to the American section of the International Chamber of Commerce from Paris on the growth of motor car ownership in Great Britain.

This, it is said, is mounting by about 100,000 cars annually, rising from 351,000 in 1923, to 787,000 in 1927. "This year's figures," the report continues, "will probably be near to the 'potential' 787,000 suggested by the Society of Motor Manufacturers on the basis of national income statistics. The latter body believes, however, that the inclusion of private cars owned by business firms, and the growing popularity of the 'baby' car of seven or eight horsepower, may raise the potential figure of 550,000 or 1,000,000,000."

"Within the home market the British manufacturer has secured 82 per cent. of last year's new car sales in Great Britain and so long as he enjoys the double protection of 33½ per cent. import duty and a tax-exemption system based on horsepower his supremacy does not appear likely to be seriously threatened."

John McCombe, chief medical officer of the Canadian National Railways, announces the appointment of A. O. Beck, as chief organizer of First Aid for the system, with headquarters at Montreal.

A finger-ring made of mistletoe was worn in Sweden as a defense against illness until comparatively recent times.

Winnipeg Newspaper Union Fashion

No. 901—Particularly Smart. This style is designed in sizes 30, 32, 34, 36, 38, 40, 42, 44, 46, 48 and 50 inches bust measure. Size 36 requires 3½ yards of 40-inch material with ½ yard of 36-inch contrasting.

No. 992—Exhaustingly Lovely. This style is designed in sizes 16, 18, 20 years 36, 38, 40 and 42 inches bust measure. Size 36 requires 3½ yards of 40-inch material with ½ yard of 32-inch contrasting.

No. 688—A Lovely Gift. This style is designed in sizes small, medium and large. The medium size requires 1½ yards of 40-inch material with 6¼ yards of binding.

No. 344—Darling Rompers. This style is designed in sizes 2, 4 and 6 years. Size 4 requires 1½ yards of 36-inch material with ½ yard of 32-inch contrasting.

No. 325—For Smart Junior. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1½ yards of 40-inch material with ¾ yard of 32-inch contrasting.

Emb. No. 11078—Design for Bedspread Pattern contains a flower basket, 15 inches wide by 23 inches high; four corner designs, 11 inches long on either outer edge, and two sprays, 4½ by 13 inches (blue).

We suggest that when you send for this pattern you enclose 10 cents additional for a copy of our Fashion Magazine, showing all the most attractive Paris styles; embroidery, etc.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Finders Are Keepers

The indignant householder held up before the policeman, the dead cat, that had been lying by the curb three days. "What am I to do with this?" he demanded.

"Take it to headquarters," was the serene reply, "and if nobody claims it within a reasonable time, its your property."

New Government Elevator

More than 100 men are employed 56 miles east of Port Arthur taking out piles for the new Government elevator and harbor improvements at Prescott. The contract for this work is the largest of its kind ever given in Canada. More than 2,000,000 feet of lumber is called for in the contract.

DAYTONA BEACH TRAGEDY

In one of the most spectacular and tragic denouements of Daytona Beach racing track history, Lee Bible, driver of J. M. White's speed-demon car, "Triplex," seeking to surpass the 231 mile world's record, set two days before by Major H. O. D. Segrave, crashed to the sand dunes and death at 202 miles an hour, snuffing out, at the same time, the life of Charles Traub, a news reel cameraman. The accident occurred before 20,000 spectators who lined the mile course and saw Bible flash by the starting point. The layout here shows: (1) Lee Bible, 42-year-old Daytona Beach garage mechanic, driver of "Triplex," J. M. White's racing car, who was killed; (2) and (3) Mrs. Segrave congratulating her famous husband, Major H. O. D. Segrave and (4) the huge crowd at Daytona Beach, Florida, who witnessed Segrave's victory and similar to the one that witnessed Bible's tragic end.

Three Prairie Provinces Are Anxious To Extend Boundaries Northward To Arctic Circle

Soviets Suppress Religion

New Law Forbids Any Gathering Of a Religious Nature

Reports come from Russia about new attempts to suppress religion. A new law has been published, by which it is intended to limit by force even private worship. It forbids every gathering or meeting of a religious nature of women, children or young men. Religious libraries or reading rooms are no longer to be maintained. All objects to be used in religious worship are declared national property, and may only remain in the hands of religious communities in the form of a loan. All public worship in hospitals and prisons—are forbidden. In the latter they may only be practiced for those who are seriously ill and who expressly ask for them. These renewed efforts are due to the great increase in religious interest of late amongst the Russian peasants.

Provincial Trade Marks

Indian Symbols Are Suggested To Distinguish Certain Products

The North American Indian was a master of pictorial condensation. Every totem told a story and told it well, and in Western Canada the proposal has been mooted that by a reversion to these totemic types much could be done in the way of devising trade marks for provincial products. The marking of goods with some distinctive label has become an important factor in economics and there is more in the suggestion than meets the casual eye. The symbols employed by the red man are unique, yet capable of infinite adaptation, and in time we may yet see on commodities a Kookoozoo, or the head of a Haida chieftain, informing us at a glance of the country of origin.

Of British Origin

Investigation has disclosed that there is British blood in 87 out of the 95 members of the United States Senate, a fact which may have some influence on the voting when the quota question for immigration is raised again. Among the United States people as a whole the British strain is only 43 per cent., so it would appear to have a particular affinity for politics.

Health Brings Happiness

It has been said that "a hale collier is better than a sick king." Health is better than wealth, because wealth cannot be enjoyed without health. One's desires and needs cannot be satisfied if the health is poor. Health brings happiness.

20,000 people are killed yearly by snakes in India.

If the Dominion government grants the requests of Alberta and Saskatchewan that the northern boundaries of these two provinces be extended to the Arctic Circle would add approximately seven-tenths to its present area, while Saskatchewan will increase its present area by one and two-fifths of the existing territory.

Alberta covers at present 255,285 square miles of land and water. Premier Brownie's proposal to extend Alberta's boundaries clear through to the Arctic, would add some 175,000 square miles of new territory to the province.

Saskatchewan's present acreage—land and water—is 251,700 square miles. The northern territory which Premier Gardiner would add to that province, is approximately 360,000 square miles in extent.

The requests, if accepted to, would make Saskatchewan's area in square miles, 611,700, and Alberta's, 430,285 square miles.

The area of the provinces at present is as follows: Quebec, 703,653 square miles; Ontario, 407,262 square miles; Manitoba, 251,822 square miles; Saskatchewan, 251,700 square miles; Alberta, 255,285 square miles; British Columbia, 355,855 square miles.

Extension of the boundaries of Saskatchewan to include the vast sub-Arctic region lying west of the Hudson Bay and south of the Arctic Ocean would add to the province a territory covering between 330,000 and 400,000 square miles, populated by a few hundred Eskimo, Indians, and half-breeds, and a handful of R.C.M.P. officers.

With the extension of boundaries as indicated by Premier Gardiner's request on behalf of the Saskatchewan government, the province would have an area of about 650,000 square miles, or about 53,000 square miles less than the area of Quebec.

Saskatchewan's bid for an outlet to the sea and extended territory in the north has drawn a counter demand from Hon. John Bracken, premier of Manitoba, for more land for Manitoba.

Manitoba has had its boundaries extended three times since the province was formed in 1870 when Manitoba was known as "the postage stamp province," bounded by a line running north and south east of the site of Brandon, and east and west on a line running a little north of Winnipeg.

In 1898 a bill was introduced into the Dominion parliament, and passed without debate, adding 100,000 square miles to the Province of Quebec. In 1912, Acts were passed adding 351,780 square miles to Quebec, 146,000 square miles to Ontario, and 180,000 square miles to Manitoba. A short time before this an Order-in-Council was granted by the Borden government passing Ontario a strip of land 250 miles long and five miles wide through the Province of Manitoba to the Nelson River to give Ontario access to Port Nelson.

Is Sparingly Populated

Although Brazil is nearly as large as Europe and larger than the United States, if Alaska is excepted, its estimated population is only about 20,050,000, or a little more than the states of New York, Pennsylvania, Illinois and Colorado. Its four largest states have an average population of only one person to two square miles.

January Building Permits Higher

January's building permits for all Canada have doubled since 1920, having risen from \$4,017,024 in that year to \$8,364,670 in 1929. This is due, in part, to a natural expansion, and also to the fact that building operations are not now halted in mid-winter as they once were.

Hertz, a German, discovered radio waves in 1887, 20 years after Maxwell, an Englishman, calculated that they must exist.

Client: "Do you think my late father looked like that?"

Modern Painter: "That is how you have described him."

Client: "Then I am glad I never knew him."—Dorfbachler, Berlin.

The Cellulose Era

Substance Is Clean and Light and Can Resemble Anything

Vistas of a chemical future, both probable and alluring, are opened by Dr. Charles H. Herty's report to the American Engineering Foundation on the new age of cellulose and sunlight, into which he sees the world emerging from darker, heavier days justly named for bronze or iron. Cellulose is a more obvious symbol, perhaps, of the frivolities of our times than of their strength. It is clean and light and fluffy and every breeze blows it away; for cotton wool is one kind of it and another is the torn paper that is New York's most plentiful contribution to visiting heroes. But cellulose has toughness, too, in its fiber, for hickory and oak are of its substance and even the hemlock's supple rope. It is what makes trees stand up straight and leaves spread out their green palms to the sun. And every bit of it is manufactured, Dr. Herty reminds us, out of things that are as free as air. One of them, indeed, is air. The others are sunlight and rain.

The great merit of trees is that they grow themselves. Plowmen need not prepare for them, nor waste no time over their seeds, farm lands at thousands of dollars an acre are not among their demands, hoes and harrows and watering pots have no duties in their plantations. All that the trees ask from man is to be protected from their greatest enemy, which is fire. Over millions of acres of land in the Southern States, Dr. Herty reports, reasonable fire protection is followed by the springing up of forests; crops of tree-fiber cellulose, manufactured gratis by rain and air and sunlight for future generations to use as paper or for all the hundreds of other products into which this universal skeleton of living plants is showing itself convertible. One difference between an acre of cellulose and one of iron or steel is that we never would exhaust our natural resources so long as the sun still shines.

It is one of the abilities of cellulose, as of Loh Chaney, that it can resemble anything. Linen and cotton cloth and paper and rayon are the simplest of its disguises. Motion picture films are made of it. The multicolored lacquers that brighten America's automobiles are another face that it can wear. It has been compressed into car wheels and spun out into tissues thinner than a fairy's spider web. It has been converted successfully into cattle food and doubtless human food can be made from it if ever there is need.

Men Less Interchangeable

Specialists In Many Lines Have Replaced General Purpose Man

Men are less interchangeable than they were once. The general purpose man is rare. Specialists, even in the field of labor and industrial work, have taken his place. And specialists cannot be moved around. Great industrial organization means high production and high wages for its specialists. But failure of that organization for any reason leaves many workers helpless and untrained for other jobs. In England unemployment has become a normal condition of disaster, and the nation highly specialized in shipping and industrial production needs great hand-pick in the post-war readjustment.

The Starting Point

The Farmer's Advocate says: "When the Government erects a new building the ground beneath is thoroughly investigated, but the Department of Agriculture attempts to build a system of farming without a knowledge of the soils and their requirements. A soil survey is the starting point in all work for the promotion of agriculture."

He: "There is something dove-like about you."
She: "You flatterer."
He: "Yes, you're pigeon-toed."

"What was your most difficult victory general?"
"Gettin' my wife past her 30th birthday."—Buen Humor, Madrid.

W. N. U. 1779

Ornamental Vines For the Home

Number Which Can Be Used To Advantage In West

There are a number of climbing plants that may be used with advantage about the homes in the prairie provinces. No plant that can be set out will more quickly improve the appearance of a bare wall or verandah. A very good native that may be found in the river valleys of Alberta, is the Western Virgin's Bower (*Clematis ligusticifolia*). This hardy vine thrives in dry districts and has been used at the Scott, Saskatchewan, Experimental Station, to screen one of the balconies of the Superintendent's residence. It is stated in Circular No. 38, of the Department of Agriculture, at Ottawa, "Flowers for the Prairie Home," that the vines of this plant make dense screens, and where poultry wire netting is used for support, the vines will grow from ten to fifteen feet in a season. The flower of the Western Virgin's Bower is white and continues during the midsummer months. These are followed by the seed pods which continue to add beauty to this perennial climber.

The Virginia Creeper, also an excellent vine for the climate of the west, is highly recommended. It is easily started from cuttings. The River Bank Grape (*Vitis vulpina*) is suggested for some locations but it is sometimes troubled with the leaf hopper and has to be sprayed with whale oil soap or kerosene emulsion to keep it clean.

Among annual climbers recommended in Circular No. 38, are the Common Hop, which makes an excellent screen during the latter part of the summer, the Cobaea Scandens and Canary Bird Vine, all of which grow rapidly from seed and make a delightful effect.

Gave the Show Away

Conjuror Had People Almost Permeated He Was Clever

A conjuror, giving a performance at a village hall, was the subject of a good story recently told by Mr. Howard Thurston, the well-known English magician and entertainer. "See, ladies and gentlemen," the conjuror began, "I have here a hat. There's nothing inside it, is there?" A loud reply of "No!" urged him on.

"Now I am going to get an egg out of this hat," and with a few movements of the hand and several mystic words he produced the egg. Applause made him feel very pleased with himself.

"Now ladies and gentlemen, I am going to show you the hen that laid this egg."

There was an apparent flutter in the hat, and the fascinated crowd watched and waited for the bird's appearance.

Up it came, perched itself on the brim of the hat, stretched itself on its toes, pushed its neck in the air, and gave one loud "Cock-a-doodle-doo!"

Not Responsible

A Jewish gentleman boarded a street car with his small son and handed the conductor a single fare.

"Why, how old is that boy?" asked the conductor.

"Four."

"Well, he certainly looks more than four years old."

"Him? Am I responsible if he worries?"

An average of 100 canaries a day were imported into America in 1928.

Count Serge Fleury

Chevalier of the Legion of Honor, attaché of the French Ministry of Foreign Affairs, author and lecturer, representing France at the fourth triennial conference of the National Council of Education to be held at Victoria and Vancouver, early in April. Count Fleury is deeply interested in the soil and in art and these will be the topics of his addresses at the conference and also at various cities en route. By his ancestry he is closely attached to the history and literature of France.

Many Nautical Expressions

Large Number Of English Words Derived From the Sea

Britishers are essentially a seafaring people, and many common expressions are derived from the sea. The man who told a policeman that he "had lost his bearings," did not mean that any machinery was missing, but that he had lost his way. In an argument, you get at "logger-heads" with a friend. Many people are "stranded" when they lose their tickets. If you have been extravagant, you say you are in "low water."

You are on "your beam ends" if you cannot "raise the wind." Funds are "at a low ebb." "Being above board," "on the rocks," "half seas over," or "on a wrong tack." We talk of "sailing under false colors," of "getting under way," "knowing the ropes," "lowering the flag," or "sailing too near the wind," of "looking out for squalls," "going with the tide," and "clearing the decks." Then there are many words of nautical origin that are used in a poetical or metaphorical sense, such as "butterflies," "berth," "harbor," "pilot," "lee-way," "A.1.," "derelict," and "sheet-anchor."

The Modern Way

Miss Wilcox kept a private school and one morning was interviewing a new pupil. "What does your father do to earn his living?"

"Please, ma'am, was the prompt reply, "he doesn't live with us. Mother takes care of us."

"Well, then, what does your mother do to earn her living?"

"Why," replied the little girl in an artless manner, "she gets paid for staying away from father."

Increasing Canada's Aircraft

The numerical strength of Canada's fighting air craft will be increased to nine planes and six army co-operation machines through delivery within the next few weeks of seven new craft. Five new Siskin and two Chintheil all metal aircraft, now under construction in Great Britain, will be the last word in fighting machines.

LONDON'S SOCIAL WORLD

Here are shown a few of those of pulchritudinal prominence and social figures in mythical Mayfair, the younger set of London's social world. (1) Miss Rosemary Hope Bere, typical English beauty, who has been placed among the ten most beautiful women of England. (2) Miss

The Spacing Of Potatoes

Clove Planting Improves Quality and Increases Yield

For the growing of certified seed potatoes there is an advantage in planting the seed fairly closely in the field. An investigation conducted at the Fredericton and Charlottetown laboratories of the Division of Botany, of the Experimental Farms, demonstrated that the close planting not only tends to improve the quality of the seed but increases the total yield. The Dominion Botanist, Mr. H. T. Gussow, in his report for 1927, published by the Department of Agriculture, at Ottawa, reports that the information gained from the investigation gives evidence of useful possibilities towards producing a greater amount of tubers ranging from 2 to 12 ounces, and so rendering the largest possible amount of tubers from the average crop intended for seed purposes eligible for certification. Mr. Gussow hesitates to make a definite pronouncement on the matter until at least another season's work is carried out. His report, which included tables showing the actual results of different spacings, does recommend spacing the sets from 10 to 12 inches, which distance makes it convenient for roguing the crop, which could not be successfully done when the plants are closer.

Makes Good Living As Applause Leader

Man Has Worked Up Unique Business In German Theatres

Professional chatter in a theatre in Berlin for 25 years, is the record of Herr Eckstein, says an article in "Tit Bits." He entered the "profession" when a theatre manager offered to pay him thirty-three pfennigs (about 8c.) a day for leading the applause from the stalls. In addition he was given ten to twelve tickets for each performance for distribution among his friends.

So great was the demand for these tickets that Herr Eckstein laid the foundations of a novel form of business, which has so grown that today he, his wife and two others lead the applause in four of the theatres in the German capital.

Berlin theatre managers who wish to make certain of a good "first night" now communicate with Herr Eckstein, and success follows.

Herr Eckstein has an estate in Mecklenburg, bought out of his savings.

Was Great Achievement

Associated Press Of America Founded By Melville Stone

To establish a news agency which supplies half the American newspapers with their news of the world, and thus reaches some 60,000,000 readers per day is no inconsiderable achievement. This feat was performed by Mr. Melville Stone, founder of the Associated Press of America, who has died at the age of 81. Famous as an interviewer, he counted popes, emperors, kings, presidents, prime ministers and famous criminals among his "victims."

The "A.P." as it is called, works in alliance with the several other concerns of the same kind in other countries, notably Reuters and the Press Association in England, Havas in France, and Wolff Agency in Germany.

Maid: "The lady can't see you; she's in her bath."
Agent: "Oh, that's all right; I'm selling soap."

Thousand Miles Of Coral

Reef Lies Off Coast Of Queensland, Australia

The Great Barrier Reef of Australia, of which little is known, is to be explored and studied by a scientific expedition which has set out from England. The Reef, says Answers, is a series of more or less parallel coral-rock reefs that lie from twenty to sixty miles away from the coast of Queensland for a length of 1,250 miles. There must be at least 1,000 cubic miles of coral in them. Its great area is largely uncovered at low tide.

As you approach by boat to its dead mass, you pass over the live coral that surrounds it, and looking into a box with a glass bottom resting under the rippled surface of the sea, see what have been described as the forms and colors of a tropical forest. There are blocks of the more solid corals and the tree-like forms of the branching varieties, all colored and covered by the living organisms, purple, green and blue, pink and brown.

Here and there as you get closer to the solid mass, you can see brilliant fishes—orange with black and white bands, iridescent green and blue, scarlet and black, blue and yellow, and of many other color schemes—passing between the branches of the coral growth. Then on the bottom lie the two-valved shells known as clams, the smaller species nearly buried in the coral and larger ones—sometimes over two feet across—lying on the surface.

The general brown appearance of the reef, and the faint odor of things of the sea give it a very special character of its own. Its rough but generally level surface is broken by temporary lagoons that more or less empty with the falling sea.

Under the edges of the coral jetam swiftly moving eels and other small fish seek hiding places, and when you turn over these blocks you send to new shelter their darting, scurrying forms.

Altogether the impression is one of seeming life, altering in the course of centuries, by an infinite amount of tiny effort, one of the strangest features on the face of the earth.

Poor Return For Kindness

Attorney Who Tried To "High Tail" Benefactor Was Properly Rebuked

Running into Albert Lasker, former Chairman of the United States Shipping Board, who has one of the show places of Miami Beach, reminded me of what he said to an attorney who tried to "high tail" him. Through his influence this attorney had been given an office in one of the big law firms in New York, and because he brought in so much business he was made a member of the firm. The day after his name had been placed on the door, Mr. Lasker had occasion to call him on the "phone about some minor matter. "Drop around at my office and we'll get out to lunch," he said, adding: "We can discuss the business at luncheon."

"Sorry," replied the attorney, "but now that I am a member of the firm you will have to come to my office to discuss the matter."

"You're joking," protested Lasker, who could not believe his ears. "No, it's an office precedent," explained the attorney, adding: "You must remember I am now a member of the firm."

"Well, it will not be necessary for me to call at your office," came back Lasker, adding, "for you are no longer my attorney."—New York Evening World.

Could Go Without Calling

As he strolled round his well-kept garden, the major knew a great content.

Beyond the lawn he came across the aged gardener, a very faithful retainer, who was still busy as only gardeners can be busy.

"Oh, Giles," beamed the major, patting the old fellow on the shoulder, "my son has been called to the bar."

The ancient straightened his back carefully before making any comment.

"Ye don't say, sir," he ventured. "From what I know of 'un, he needs no callin'."

Recreation Must Be Enjoyable

If whacking a golf ball over green slopes under the summer sun gives you a sense of well-being and happiness that you can get nowhere else, then by all means play all the golf you can. If you get the same enjoyment out of collecting postage stamps, or making ship models, or driving an automobile, or fishing, or trying to write poetry—by all means follow your desires. Nothing is much more essential to a complete life than a form of recreation that fits your inner wishes.

Birds of Passage

Migratory Instincts Of Certain Species Of Birds Are Matters Of Mystery

A snow-white Arctic tern, banded as a fledgling in Labrador on July 23, 1928, was found dead at Margate, in Natal, on the southeast coast of Africa, 9,500 miles away, on November 14. Possibly that tern may help to answer the old mystery of the migration routes of the world's greatest travellers.

In mid-June the Arctic terns appear in Labrador, in Baffin Land, in Greenland, far up within the Arctic Circle. They nest as far north as there is anything stable on which to lay eggs; one nest found 7½ degrees from the North Pole contained a downy chick surrounded by a wall of fresh-fallen snow that had been scooped out of the nest by the northern tern. When the midnight sun begins to sink low in August the terns fly south. Ten weeks later they are darting about the shores of the Antarctic continent, 11,000 miles away in a direct line, again in a land of midnight daylight. They are darting over Byrd's frozen camp today, but by what route they make the circuit from one pole to another no man knows. Agents of the United States Biological survey have banded hundreds of fledgling terns on the nesting grounds at Turney Bay, Labrador, and elsewhere. One of these birds was picked up near La Rochelle, France, on October 1, 1927; now another bird has been found on the far side of Africa.

There are other bird mysteries; why birds that nest in the Far North cross the equator in mid-winter, while birds that breed in the Far South are content to drift a few miles toward the belt line of the earth; where the chimney swifts go when they disappear on the coast of the Gulf of Mexico in autumn; why the Connecticut warbler, which nests north of Lake Superior, always travels south along the Atlantic coast in the autumn, and in the spring moves north through the Mississippi Valley. But there is no migration mystery to equal that of these birds of sunlight, which seem unable to endure the dark mid-latitudes of the earth. No living creature sees the sun for more hours in the year for eight months the Arctic terns never face night. They skim the entire breadth, of the ocean twice each year and revel, at both poles, in perpetual sun.—New York Herald-Tribune.

No Incentive To Think

Rush Of Modern Life Calls For Ready-Made Opinions

Nowadays, perhaps the incentive to think is less than it has ever been. We have our opinions ready-made for us. It is troublesome to think things out for ourselves; we are perfectly willing to take them on trust. What we call our opinions are usually second-hand—they are the opinions of others. The hurry and bustle of modern existence is not conducive to thinking in fact, a kind of contempt is growing up for the contemplative individual. It is knowledge—the kind that is easily procurable in the magazines and libraries—that counts very useful indeed, certainly, but not as valuable, after all, as original contributions to the store of human wisdom, which may only come from the development of special qualities of mind and soul.

Speech Was Wasted

A political canvasser, after expending twenty minutes on a doorstep diluting on the glories of his party, asked the woman of the house if she thought it would be any use his calling again, when her husband was at home.

"No," was the unexpected reply. "You see, we are already insured with one company."

"Pa, what is dignity?"
"Dignity, my boy is what you think you possess until the boss says: 'What is the meaning of this?'"

"What do you think of the twins?"
"The charms' 'toxicant' one I can already see double."—Monty, Charleroi.

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerville. Half a teaspoonful of Nerville in water makes a most efficient gargle. The germ-killing properties of Nerville quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure, to rub the neck and chest with Nerville. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding wastes. This combination treatment of Nerville and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

WORLD HAPPENINGS BRIEFLY TOLD

The Canadian Pacific Railway contemplates constructing a modern hotel in London, England. It is revealed in the annual report of the company.

Over two-thirds of the immigrants who entered Canada during the ten months of the current fiscal year came either from Britain, the United States, or preferred country sources. The Edmonton Exhibition this year celebrates its fiftieth anniversary, the first show having been held within the walls of Fort Edmonton in 1879.

For the eleven months of the current fiscal year April 1, 1928, to February 28, 1929, immigration to Canada totalled 152,911, an increase of 15,979, or 12 per cent, over the corresponding period in 1927-28.

Reindeer racing is to be tried in Vancouver where a "stud" of twenty reindeer has been established and six Eskimo drivers are being trained to race their novel steeds round the track.

The British Admiralty has awarded a "good service" pension of \$750 per annum, beginning March 1, to Captain Kenneth C. B. Dewar, formerly commander of H.M.S. Royal Oak, who figured in a notable court-martial at Gibraltar last April.

Carl B. Eielson, of Haton, N.D., pilot for Captain Sir George Hubert Wilkins on his North Pole flight, was awarded the Harmon trophy for 1928, which is given to the U.S. flier making the greatest contribution to aviation during the year.

A Vancouver dispatch to the Montreal Gazette says: "The Duke of Gloucester (Prince Henry) who has left London for Japan to invest the Emperor with the insignia of the Order of the Garter, is expected to return home via Canada. It is understood the Duke will spend a holiday at his brother's ranch at High River, Alta."

NEW BABY DISTURBS TIRED OFFICE WORKER

"When my oldest boy was just a few weeks old he was badly constipated from my milk," says a Nebraska mother. "He kept us awake so much, my husband almost slept over his desk at the office. Then my doctor got us to give baby some Castoria and the next day he was much better. His stomach and bowels began acting perfectly and he gave us no more trouble." Avoid imitations of Castoria. The Fletcher signature marks the genuine, purely vegetable, harmless Castoria, doctors everywhere advise for those ill of babies and children, such as colic, constipation, colics, biliousness, etc.

Queer Rule In India

There is a rule in India that a younger daughter may not marry before the elder. In case the younger wishes to marry however, the way out is to marry the elder daughter to a tree or large flower, due care being taken that it be not a pine, poplar or cedar, for these are sacred and it is difficult to get a divorce from any of these.

One of the "Young Ambassadors" who visited Canada last summer, Frederick Thomas Mace, of Old Kent Road, London, England, will return to Canada to take up farming.

Money In Fish Scales

Product Makes Essence Used In Manufacture Of Jewelry
The boast of the modern meat-packing industry, that all the pig is utilized except its squeal, is now followed by the announcement of the Maine fishing industry, that all the fish is being utilized, even its scales.

Pearl essence plants at Portland and at other points along the Maine coast are offering seven cents a pound for fish scales, and tons of scales formerly discarded by fishermen have been sold this season at a total price estimated at \$250,000.

One hundred pounds of the scales, for which the essence factories pay \$7, are required to produce one pound of pearl essence, valued at \$125 in the New York market. The essence, after elaborate processing, is used in the manufacture of beads, necklaces and miscellaneous jewelry.

The spinning and weaving of cotton is one of the most important and largest of the manufacturing industries in Portugal.

NO MEDICINE LIKE

BABY'S OWN TABLETS

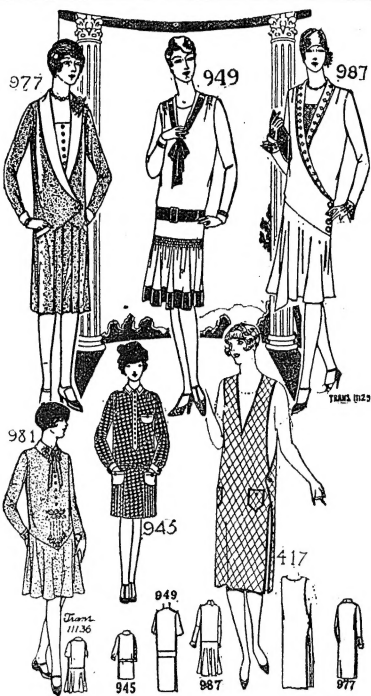

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child. The Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

FASHION

No. 977—A Temptation. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 3/4 yard of 10-inch contrasting.

No. 417—Truly Practical. This style is designed in sizes 38, 40 and 44 inches bust measure. Size 38 requires 2 1/2 yards of 36-inch material with 9 1/4 yards of binding.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

No. 981—Attractive Junior Frock. This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2 yards of 40-inch material. Emb. No. 11136 (blue) 25 cents extra.

No. 987—Trim-Smart. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 2 1/2 yards of 40-inch material with 1/2 yard of 10-inch contrasting. Emb. No. 11129 (blue) 25 cents extra.

No. 915—One-Piece Short Dress. This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2 yards of 40-inch material with 1/2 yard of 10-inch contrasting.

No. 919—Grace and Charm. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust

MAKE BETTER HOME MADE BREAD

A Meatless Luncheon

The following tested recipes solve the problem of a tasty luncheon without meat:

- Tomato Chowder**
2 cupfuls Borden's St. Charles Milk.
1 pint hot water.
2 1/2 cupfuls canned tomatoes.
1 medium sized onion sliced thin.
1 tablespoonful butter or butter substitute.
4 tablespoonfuls flour.
2 teaspoonfuls sugar.
2 teaspoonfuls salt.
1/2 teaspoonful pepper.
1/2 teaspoonful soda.
6 water crackers split.

Melt the butter in the top part of the double boiler, add the onion, and cook it gently till yellowed, about five to eight minutes. Pour in the milk and water, set over the lower part of the double boiler and scald. Mix the flour, salt and pepper with enough cold water to make a smooth cream; stir it into the milk, and cook about fifteen minutes, stirring occasionally. Heat the tomato with the sugar; when boiling, add the soda and combine it with the thickened milk. For serving, put a split cracker which has been dipped in warm water, in each plate.

Many hotels in Europe permit passengers on their way across the Atlantic to reserve their rooms by radio, at the charge of the hotel.

SUNDAY SCHOOL LESSON

APRIL 7

THE MINISTRY OF ISAIAH

Golden Text: "Then I said, Here am I; send me."—Isaiah 6:8.
Lesson: Isaiah 6:1-13; 7:1-7; 20:1-6; 38:1-22.
Devotional Reading: Psalm 118:12-19.

Explanations and Comments

Isaiah's Heavenly Vision, 6:1-4.—In the year that King Uzziah died, I saw the Lord sitting upon a throne, high and lifted up; thus the prophet Isaiah begins his account of his vision and call to service. "This is more than a duty; this is an experience!" exclaims Dr. C. R. Brown. Isaiah had a vision, a dream, in which God was vividly real to him.

"Isaiah saw God. Do men see Him today? Was He any nearer to Jerusalem than He is to London or New York? Did the old Hebrew possess faculties different from ours? Can we see and know God? What do we mean by seeing and knowing God? A spirit cannot be seen with physical eyes. We mean that we are so convinced of the reality of God, our thinking and living are determined by that conviction; so sure of Him that we live as if we saw Him by physical sight."—Amory H. Bradford.

"No face; only the sight Of a heaving garment vast and white With a whisper that I could recognize."—Browning.

"The king was dead, but God was alive. Who shall say that it was not something of the same strength of faith that came to James A. Garfield, when, speaking to a discouraged multitude in New York after the assassination of Lincoln, he exclaimed: 'God reigns; and the government of Washington still stands!'—J. T. McFarland.

There are approximately 258 cinemas in Finland, totalling 40,000 seats.

Women, in some provinces of India, have been eligible to vote since 1924.

Gulf Stream Misbehaving

And Berlin Professor Is Predicting Another Glacial Age

The Gulf stream is behaving badly, according to a Berlin professor, who says it is flowing backwards in certain places. If it goes on like this we are told, we shall be back in a glacial epoch, some time or other. Many years ago the same charge was made against the Gulf Stream, and a journalist asked his editor what should be done about it. The editor, somewhat cynically, replied that it was a good one-day story, which turned out to be a correct estimate. Another prophecy that in 20,000 years time we shall be enduring another ice age in Northern Europe, leaves us—no not even cold. These long distance forecasts are safe enough to make, because when the time comes their authors will in all human probability be forgotten. We had much rather hear on reliable authority what the weather will be like this day week.

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store.

Nearly ten million fish eggs and fry were transported over the Canadian National lines in 1928, for the stocking of lakes.

Feeling Run Down?

Over 400,000 women and girls who were weak, "blue," nervous, run-down, and unable to do their work properly, have improved their health by taking Lydia E. Pinkham's Vegetable Compound. By accurate record, 58 out of every 100 report benefit. You can be almost certain that it will help you too.

Outstanding Authorities

on Farming and Live Stock Offer You Practical Information and Advice Based on Many Years of Successful Experience

The greatest array of practical, usable ideas for the Canadian Farmer ever gotten together in one book and it is

FREE

This book is offered as a contribution to the development of farming and live stock breeding in Canada. A group of outstanding farmers and agricultural writers have put into writing the methods and findings which in years of experience, have proved most successful.

The practical experiences of these men have been compiled for Imperial Oil Limited, by the Hon. Duncan Marshall, former Minister of Agriculture for Alberta, and put into the book "Field and Farm Yard" which is a valuable storehouse of information and advice based upon actual and successful farm operation.

This book is offered to you free by Imperial Oil Limited.

"Field and Farm Yard" has been written by specialists in farming and stock breeding. There are articles on feeding beef steers and dairy cows, and on the care of horses, all written by Thos. McMillan, M.P., and S. G. Carlyle, Alberta Live Stock Commissioner. Scientific facts for the farmer, and the stock raiser, are given by Ewen, W. L., Carlyle and R. A. Wright. Grain farming is treated by Dr. C. E. Saunders, producer of Marquis Wheat. All recommendations are based on the practical experience of farmers who are now using them to increase their incomes.

CHAPTER XVI.—Continued

"Oh yes," he replied absently. "You were gone for some time this morning she stated."

"Yes," he concurred, "I went up to bring Connie."

"Oh!" Janet's fine eyebrows lifted slightly, and she looked at Donald with a curious intendment. "Why didn't she come?"

"She wasn't home."

Her woman's intuition long ago had told her that the "woodenpate" as Donald called Connie, was madly in love with him. As she looked at him now and noticed his pre-occupied air, a pang of jealousy struck through her heart like an arrow.

Was it possible that he had begun to realize that the wild girl of the woods was not a child, and that she loved for her had been kindled in his heart? The thought made her feel faint and she tried to put it from her mind.

Lunch was finished now and they were walking back to the lake. Douglas invited the party to take a trip around the lake in a motor-boat, to which they assented gleefully.

Janet hesitated as Donald turned away with Wainwright. "Aren't you coming Mr. McLean?" she called.

"Donald turned and shook his head. 'I may be needed here,' he said briefly."

Janet flushed to the roots of her dark hair and bit her lip in anger. She was not used to being thwarted in her desires.

Donald and Wainwright seated themselves on a bench under the willows and lighted cigarettes. Donald was ill at ease. The sound of Connie's tragic sobbing was ringing in his ears. He could see her little figure writhing on the ground in a tangle of grief that had torn at his heart-strings. He sprang involuntarily to his feet and began pacing the ground with quick, nervous strides. Wainwright glanced up at him interrogatively.

"You seem worried," he volunteered.

"I am," Donald admitted briefly. "Donald was in a woe of indecision."

How should he broach this delicate subject? Although poor as he the proverbial church-mouse, Connie's father had the pride of Lucifer. There was natural dignity in his bearing, a certain aloofness in his manner, that in no way interfered with his unfailing courtesy, but had always precluded exchange of intimacies. He had resided in this wilderness for many years, but none could say that they had any more knowledge of his affairs at this moment than on the day of his arrival.

Donald decided to take the plunge. He sat down on the bench beside Connie's father and related the scene he had witnessed that morning — of Connie's preening before the mirror with the magazine page planned to the logs; of the struggle with her hair; of the flour sack, and of the piteous sobbing of the heart-broken child.

Wainwright's face flushed painfully. "I hope you do not consider me presumptuous," said Donald, a note of anxiety in his tone.

Wainwright's hand reached forth to clasp Donald's firmly. "No, I do not doubt your sincerity. An inordinate sense of pride has kept me in my present circumstances. This circumstance you have related has brought me to a realization that it is a selfish pride, as it has denied Connie the privileges to which she is entitled. There is nothing I can say," he went on in bitter self-condemnation, "that can even partially condone or palliate my stupidity. I should have known that she would require proper clothing now that she is growing up. As a matter of fact," he paused, his distress acute—"my finances are at a low ebb."

"How old is Connie?" asked Donald, hoping to relieve Wainwright's embarrassment.

"Nineteen."

Donald's head came up with a jerk. "What!" he almost shouted.

"She is nineteen," Wainwright reiterated, a peculiar expression in his eyes as he noticed Donald's bewilderment.

"Nineteen!" Donald re-echoed, a bemused look on his face. "Great Scott! This is a surprise. I thought of Connie as being not more than fourteen or fifteen."

"Connie's healthful outdoor life has tended to keep her young, and her mode of dressing enhances her youthful effect," said her father as he sat down wearily, a far-away look in his eyes. "Her mother," he went on softly, a tremor in his voice, "was just like her; at the age of twenty-five she looked almost a child."

He turned to Donald. "No doubt you have wondered why I buried myself in this wilderness?"

Donald nodded. "At this moment they were interrupted by members of the Sports Committee, who wanted Donald's advice on a matter pertaining to the afternoon's programme."

It was evident to Donald as he withdrew that Wainwright had been about to disclose his past history, a history which had been locked in his heart these many years.

At three o'clock the crowd began drifting toward the race-course. The centre of the valley had been cleared of under-brush, and the long grass burned under the watchful eye of the fire-ranger. A small creek and a few swampy places had been "cordoned off" with cedar poles and then covered with soil. A judges' stand, with a few hastily erected seats for Janet's party, stood near the finishing point. The horse-race has been said, was to be the feature event of the day. The crowd surged happily from the lake-shore to line up in orderly ranks about the oval.

The brilliant and diversified colours of the Kitchissippi's skirts and head-gear showed in bright contrast to the drab wearing apparel of the white men. The Slivash Indians were dressed in nondescript clothing as to trousers and coat, but one and all wore wide-brimmed cowboy hats and displayed silk handkerchiefs of gorgeous hues, knotted at the throat to drape their shoulders curiously. Three husky farmers' sons from Pemberton rode to the starting-line

and hearty hand-clapping and shouting from their friends. A swarthy-skinned rider, mounted on a spirited black cayuse, came prancing through the crowd. He lifted his hat and smiled in acknowledgment of the plaudits of the spectators. This was Joe Lafonte, the half-breed who had won first prize at the Lillooet races for the past two seasons.

The wise ones averred that Paul John, of the Indian contingent, would give him a hard race. Paul John's cayuse was young, but the previous year he had run the half-breed's horse a close second. Money was being placed on all sides, particularly by the Indians, who are inveterate gamblers. Amid an excited babble in Chinook, some Indian riders came laughing and shouting, with much waving of hats, to praise about and display their horsemanship before the admiring crowd.

Donald, with Andy, Gills and Wainwright, stood leaning over the edge of the judges' stand watching the animated scene below.

At this moment there was an agitation at the far end of the oval, where the crowd opened to admit a horse and rider that came tearing down the course like the wind.

"Look!" Donald shouted excitedly as he seized Wainwright's arm. "It's Connie!"

Down the course, riding like a spirit of the woods, came the girl, her golden hair blowing about her face, attired in her mettlesome horse and riding as if the wilderness belonged to her alone.

Pegasus was not used to crowds. With arched neck and quivering flanks he reared on his hind-legs to poise an instant, then leaped forward like a rabbit. Connie sat on the bare back of her advent cayuse as calmly as a part of the animal, her slender body moving in gentle undulations in perfect co-ordination with the movements of the horse. She was hard to keep from running over the other riders who sat mouths agape.

Connie was unknown to the greater part of the crowd. To them she was a little like a geyser, with her mass of shining hair, appeared as an apparition. Her firm little hands soon checked her turbulent mount, who stood trembling with nervousness. The crowd gave her a rousing welcome as soon as they had recovered from their astonishment.

"Who is she? Where does she come from?" they shouted.

Connie kept her eyes fixed on the ground. She was outwardly calm and serene; inwardly she was as nervous as her fretting cayuse, and did not dare raise her flushed face to meet the battery of eyes around her.

(To Be Continued.)

THINNESS

Over-thinness is detrimental to a child's progress in growth and health.

Scott's Emulsion

of vitamin-rich cod-liver oil is a body-building food and tonic that overcomes thinness and helps build up a sturdy body.

Scott & Bown, Toronto, Ont. 25-63

Succeeds To Title

Resident Of Vancouver, Through Death Of Cousin, Becomes a Baronet

A second Canadian romance of the British peerage within recent weeks has come to light in Vancouver, in the succession of Eric Windham Francis Carmichael-Anstruther, to the baroneties of Carmichael and Anstruther.

The Vancouver man, now Sir Eric Windham Francis Carmichael-Anstruther, bart., has left for the family seat, Carmichael House, Thankerton, Lanarkshire, Scotland, to settle matters in connection with the estate following the death of his cousin, Sir Windham Frederick Carmichael-Anstruther, bart.

Sir Eric expects to be in the old country about three months, after which it is his intention to return to Vancouver, where he has been employed as a draftsman for the past three years.

Sir Eric comes of a very old Scottish family which traces its ancestry for 700 years. He will be the 11th baronet of Anstruther created in Scotland in 1700, and eighth of Carmichael, created in England, in 1798. According to a directory of titled persons he will also assume the honor of hereditary carver of the royal household in Scotland and one of the masters of the household.

Recipes For This Week

(By Betty Barclay)

FRUIT FRITTERS

- 2 oranges.
- 1 egg.
- $\frac{1}{4}$ teaspoon salt.
- $\frac{1}{4}$ cup milk.
- $\frac{1}{4}$ cup flour.
- $\frac{1}{2}$ tablespoon cooking oil.
- $\frac{1}{2}$ teaspoon baking powder.
- $\frac{1}{2}$ teaspoon sugar.

Beat egg until light; add milk, flour, sifted with baking powder, sugar and salt, and oil or melted butter. Beat until smooth. Pare oranges, removing membrane with peeler; cut in slices, and sprinkle with sugar and a few drops lemon juice. Have deep fat, hot enough to brown a piece of bread while counting to sixty. Dip orange sections in batter mixture, and fry in deep fat until puffed and brown. Do not fry too many at one time. Drain on brown paper, sprinkle with powdered sugar, and serve with orange sauce.

APPLE AND ORANGE SALAD

Peel and slice oranges, rejecting white membrane. Cut wedge-shaped slices from red apples, without paring. Arrange on lettuce-covered salad plates, using alternate slices of orange and apple.

GRAPEFRUIT SALAD

Peel oranges and grapefruit and divide into segments, rejecting all white skin. Arrange a circle of orange segments on a lettuce-covered salad plate and fill centre with grapefruit segments.

Automobile Is Real Benefit To Humanity

Curse Is Man Who Does Not Use It Wisely

The automobile, in itself, cannot be a curse to anyone. The curse of the automobile is that of the human element, of the man who does not know how to use wisely an instrument of real benefit to humanity.

Unfortunately the human element cannot always be controlled. There always will be those who use automobiles for law-breaking purposes, and who drive them so recklessly as to endanger the lives of other people.

If all automobile owners and drivers were imbued with a real sense of their responsibility to their fellow men, there would be very few accidents and there would be need of no judges or anyone else having to make remarks derogatory to a machine that has become an essential part of this country's life.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

Small Son: "What are diplomatic relations, father?"

Wise Parent: "There are no such people, my boy."

Use Minard's Liniment for the Flu.

In the influenza epidemic of 1918-1919, in India, more than twelve million of the population perished.

The annual catch of whales in the Antarctic exceeds 10,000 a year.

W. N. U. 1779

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 60 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go and get this for your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in getting excess acids. Each bottle contains full directions—any drugstore.

Inventor's Claim Unusual

Wisconsin Chemist Says His Mechanical Device Can Be Taught

Claim that he has invented a mechanical device which is capable of being "taught" is made by Dr. H. D. Baerstein of the University of Wisconsin physiological chemistry department, following a challenge issued six months ago by C. L. Hull, professor of psychology at the state school.

Dr. Baerstein's "thinking" apparatus consists of numerous switches, wires and an incandescent light. The mechanism, he said, is so arranged that the bulb may be lighted by one of the switches and that any of the other switches may be "taught" to light the bulb. The operation he claims, is analogous to the presentation of stimuli.

"The machine," Dr. Baerstein declared, "is merely a symbol of mechanism of the human body."

Externally Or Internally, It Is Good—When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissues, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Just a Memento

First Housewife—"I suppose you carry a memento of some sort in this pocket of yours?"

Second Ditto—"Yes, it is a lock of my husband's hair."

"But your husband is still alive?"

"Yes, but his hair is gone."

Has a Reason

The mayor of Minneapolis has been asked to confiscate and destroy all the Gideon Bibles in that city. The reason is logical enough — the Scriptures say a lot about St. Paul but nothing about Minneapolis.

None of us ever gets anything for nothing, but that doesn't keep us from trying.

Little Helps For This Week

"Do thy diligence."—2 Timothy iv. 9.

There lies no desert in the land of life.

For 'e'en that treat that barrenest doth seem, Labored of thee, in faith and hope, With heavenly harvest and rich gathering life.

—Frances Kemble.

When you awake in the morning, and when that heavy pain wakes too—oh, so sharply!—and the burden of a monotonous life falls down upon you, or rises like a dead, blank wall before you, making you turn round on your pillow, longing for another night instead of an insupportable day, rouse yourself. Remember what you are—children of God; Say, "What have I got to do today?" Not "What have I to enjoy or suffer?"

But "What have I to do?" Don't try to be happy, but try to work, work for God, and happiness will come.

New Books Published

Last year holds the record for the number of books published. There were 10,612 new books, and 3,787 new editions issued in 1928, compared with 10,324 new books, and 3,476 new editions in 1927.

When the skin is moist, the resistance to electricity is greatly decreased and serious shock may result from relatively low voltage.

FLU

Claims Many Victims in Canada and should be guarded against.

Minard's Liniment

is a Great Preventative, being one of the oldest remedies used. Minard's Liniment has relieved thousands of cases of Grippe, Bronchitis, Sore Throat, Croup, whooping cough, and all the ailments of the chest and throat. It is an Enemy to Germs. Minard's Liniment Co., Ltd., Yarmouth, N.S.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100% Sunlight Send for booklet "WINDOLITE"
